

acid rain robot repair

bangin on my oxygen
3 years old again
always known to win
soon i'm closin in
watch it last
cause it all ends fast
you never knew where your life could take you
follow the plan
read the outline
smell the roses
feel the sunshine
hold that girl's hand
kiss the neck too
stella artois or a becks brew
will do
anytime for the longest day
if you stay don't many promises
cause i will leave you
definitely
if you miss me
transmit quickly
it gets ill not sick
1st pick was hit around am 6
don't play me thick, i lay it on
if you like to play games
cool i'll play gone
the medic, who always see where you're headed
come into my hand so i can make you not regret it
hey, my motto's don't sweat it
that's only one of em i hope you don't forget it
comfortably pause lost in the fog
find me, follow the voice from the call
down for the long haul or the one night
make no mistake they both have to be done right
hyper tense, haven't seen you since
you told me of a strange dream sequence
consequently, what happens now
is simply a matter of personal style

things are getting harder
those mistakes are hard to take
i brought your silver lining
repetition wears you out

underpowered
understood
next in line
rephrase your signs

oxidation creeps in
slowly permeates
pours down acid rain

how would you define escapism
a loose interpretation
of the well informed
inside the norm you fall
crumble and stall
left humbled in awe
but you still feel the need to leave
and I need to see more than you
take it to the floor cause I'm boring you
laws are the cause of effects
to section off the lost to break away
find a place to stay in
focus swayin
no longer maintainin
your sanity is callin out my name and
i listen cause i'm there for that
prepared for the black and white print to read
where you going tonight
with your heart on your sleeve
but what's on your mind
open it so i can see
maybe later as i elevate you and sedate you
never let me be what you pray to

things are getting brighter
we're telling other kids to bail
cheeks that once unfrozen
start behaving like
they just might explain

silver silencer finds gold
the smoking gun that
could unfold
your escape route is
a wasted resource
a one way exit lane

(malfunction)

can you help me? sure
what do you need? more
it's pure
it feels like never before
can you help me? sure
what do you need? more
it's pure
it feels like never before

can you help me? sure
what do you need? more
more what? enhance my senses
i feel when i'm senseless
i'm so defenseless
what is this? close your eyes
can you feel this

as i probe the frontal lobe
you gotta relax if you don't you'll explode
welcome to my fresh world no one knows
i saw you thru the keyhole
lies exposed
don't feel guilty, it's only me around
i made it possible you can see every sound
i'm licensed, I don't work in silence
now you can live your life beyond science

mystify your reasons
but what i'm trying to create
rusty bolts reclaiming
broken wires restore faith
right before you state your claim
right before you choose your aim
i will wear my mark
and proudly display
what you've been trying to break

bleed

hey you swore
you'd take it all away
it's safe
to blow it all away
your fly-by-wire
means brush off time
and time again
your eyes on loan

hey you swore
you'd take it all away
it's safe
to blow it all away

is that what you think of me?.....yes
is that what you think of me?.....mmm
is that what you think of me?.....yes
is that what you think of me?.....yes
is that what you think of me?.....yes

is that what you think of me?.....no
is that what you think of me?.....yes
is that what you think of me?.....yes
is that what you think of me?.....yes
is that what you think of me?.....mmm
is that what you think of me?.....yes
is that what you think of me?.....yes
is that what you think of me?.....yes
is that what you think of me?.....no
is that what you think of me?.....yes

lower than a meaningless life
what's that?
ask a question no reply comes back
never expected one in the 1st place there's none
don't try to understand me
i've already begun
so myopic , don't be concerned with my options
i choose the desperate
now I'm forever indebted
i play with words and hearts just the same
i'll never recollect those sweet things you were sayin
i once heard time's written on the wind
if it's meant to be we'll see each other and speak again
intrigued by my ignorance
moved by my passion
confused by your futile attempts of advancement
let me plaque you
as I save you
and as you let me
promise that you will never forget me
how selfish....and admittedly so
third person time I'm sick and how didn't she know
1st person time, i need to not feel confined
i need, i want, i do a lot to get by
i'll give you that late call
leave you appalled
on your heart I'll gnaw til it's not there at all
how selfish....and admittedly so
third person time I'm sick and how didn't she know
i'm on the move like telecommunication for nations without it
i need some time away I feel crowded
i didn't mean it
i'm lost with out you chasin me
without looking back
i could never find a place to be
here, let me tell a few lies
i'm honest, i never break a promise, i don't cry
the rock's in the water, gravity won't let it float
come into my office don't breathe on my stethoscope

you must be wondering which me to believe
the vulnerable one or the jerk that makes your makes your heart bleed

hey you swore
you'd take it all away
it's safe
to blow it all away
your fly-by-wire
means brush off time
and time again
your eyes on loan

runnin circles

inside the melody
lost complex
the labyrinth beckons
release the reflex
react to the nonsense
skip to the beat
lose yourself in your dream state
never compete
you can't lose what you never possessed
progress wasn't meant for you i guess
i suppose, i ponder, i wonder
contemplate, pontificate, proliferate my numbers

everything I told you had a reason and a motive ulterior or not still exists
the movements never change and we seem to entertain the notion that
we can't give up we must persist
the energy's unlimited the resources the same can't explain how they
can't keep up with this....it's all
emotional prose, you know how it goes when it explodes it has to top the
list

but wait
you know i'd never
explain
been runnin circles
but as of tonight
i will be waiting
i'll put up a fight
to make it all seem
so much braver

seen as fiend that's keen to lean on
the peons gotta get the game up and speed on
over the moon beyond june and spring

an enthusiast told me soon she'll sing
multifarious angles for the well rounded
intellectuals fold when left dumbfounded
oh, you found it, sad like you lost it
happy like you wanna give it away or forfeit
memories swim in my heart for their life
no land in sight, no soft words to recite
home in the darkness, lost in the light
or the other way around the other way it could sound is trite
infinite intricate insight
intrinsic rhythmic traits and satellites
funny how it happens and it satisfies the senses
relentlessly, i stay composed in the system

but wait
you know i'd never
explain
been runnin circles

of everyone who's anyone that claims to know anything about what i'm
talkin about to you
are you ready for a version of life that just might turn your sight to what
we're about to do

every time i wanted it i had to find a way to make it work inside the realm
of what's possible
and even if i couldn't i would fit it in my passionate database of things
that's soon to blow

wait
you know i'd never
explain
been runnin circles
but as of tonight
i will be waiting
i'll put up a fight
to make it all seem
so much braver

space gangsta

laser gun battle
space travel
comin at you
you know, gangsta and what have you

going through space don't pull on my coat and
me and arne, i guess you call him styro to the foam
don't call me on the phone
left home many years ago
pursuing dreams and
i'm dreamin just creamin
these girls they got wings and
they try to follow, they can't follow me
inside my galactical borough
i float and fly and float and fly,
make the young girls cry
from planet to planet i jump
cosmos nebula, what you want punk?
you can't get any, you can't have none
i can shoot you up with my ray gun
and they call me the space gangsta for short

this is an s.g.a.

a space gangsta announcement
brought to you by the same people
who you bring you all the other heat in your life

how hot you may ask?
ask the sun if it's thirsty

what do you know about deep space?
we can tell you where heaven is
if you act right,...tell your friends..spread the word...

we had a moment in time and then it stretched
time stretch pitch shift correct
we had to, offset the timing i'm rhyiming
also inclining where your mind is meeting me
so now we see what's happening with the decency
nobody really explains what it could mean to us
so we bust we don't combust we're not combustible
we're never trustin you
we're just floatin through space and time
creating dimensional shifts, space gangstas and shit
every time we float we see what's happening
yo my man press the cycle button
so now we know what happenin's bringing nothing
we bring a lot of opposite of that making sure that it's
hot and fat
following the screens, the monitor's 17 inch... beams

laser gun battle
space travel
comin at you
you know, gangsta and what have you

cosmos nebula
the same channel
comin at you
you know, gangsta and what have you

nervous inaction

dear (insert name here),
i just wanted to explain a couple of things
i want you to know i'm not the freak i seem to be
i mean i am but not how you think
what i'm trying to say is i like seeing you
and i like you a lot
every time i sit next to you and open my mouth
to say hello, i just get stuck
i get up and walk away and feel like an idiot everyday
it's not you,

this is how i function
i get nervous
this is how i function
i get nervous
this is how i function
i get nervous
this is how i function
i get nervous

even writing this is hard for me
i hope you can see past everything that
could make being around me unbearable
i'm not a bad person and i'm sorry if it seems
like i stare but sometimes it's as if you stop
time itself
at least it seems that way to me
but it's not you, i just wanted you to know that

this is how i function
i get nervous
this is how i function
i get nervous
this is how i function
i get nervous
this is how i function
i get nervous

myself of what happened the last time i was trying
to escape fate...they say it's truly rare

i hate to make the rest wait...but the test took a lot of
fortitude....dealin with the rude actions

i'm the worst when it comes to kontakt
i programmed a line of personnel to match your format
shift the formants these words are important
divorce boredom, your man's ready now sport him
incased in the image of illusions uploading

nanotech creates the hocus pocus in your life
the long journey began with the 1step edit
you repeat then overdub the bad habit
the gothic girls by the ice cream truck
enjoyed the sunlight before the clinic nurse stepped up
to install this...witness the main event
brand new without the same attempt..
i won't apologize for the delay, i sculpt filters
twisted sound waves create mental pictures
you call it a dream, electronic magic 26

plug and play have you had your drugs today
if not, let me freeze your system now ease and listen

and if you wonder
how to relate

making changes
i'll upgrade all you want
today

so pick a number

scream it out

hey!

you can scream it out

you can scream it out

you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you...

what would you do if
you found out that
no one is out there?
how would you cope
if you found out that
no one is left?
if it's the same
than i'd rather be stuck
in this no man's land
what would you do if you found out
that no one is left?

you can scream it out

you can scream it out

hey!
you!
move!
now!

you can scream it out

you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out
so now you gotta let it out
because you need to let it out
and if you never let it out
you're gonna have to let it out

you can scream it out

hey!

you can scream it out

the middle

thru it all I stand tall
never take a fall
i work with the vultures
who wanna perch on my skull
it gets more bizarre
heaven's in my car
lost lover found my phone number at the bar
pickin at my scar
pain left ajar
you've never met the real me
you fell for my facade
often misread with no concern for anything
until I lost my ring
cause it was such a pretty thing
do you know what i mean
it was bright like a sunlight beam
i might be lost in a dream but it's a perfect scene
let it close and reopen to me in a stance for prayer
the only chance i had i took it for a gasp of air
i'm not one of those people that says life's not fair
i'm one of those people that says life's right there
in the middle of my hand like lifelines and many lives
you should know what it is when see me man give me five

but i got

stuck there
right in the middle not
knowing
these unbelievable
thoughts could
cross your mind

and please say
something
it doesn't matter what
somehow
i am beginning to
understand your vows

don't bother me, keep it steppin like the ground quaked
it's serious business seducing souls with a soundscape
you can meet me at the world's end chillin
you'd probably consider that the time to ask how i'm feelin
until then i'll rock, non stop with compulsion
i know you feel alone when you indulge your impulses
but don't sweat that or anything else you consider a set back
relax with me, we'll meditate to a click track

as it resonates don't hesitate
to claim what's yours before it disappears or detonates for sure
leaving only moments for us to keep counting
or more time to perfect your self doubting on this outing
you should have learned that there was no turn back
we're in this together i guess for more or for less
we can find a way but we have to stay synchronous
so that means no thoughts of if our loved ones think of us

but i got
stuck there
right in the middle not
knowing
these unbelievable
thoughts could
cross your mind

and please say
something
it doesn't matter what
somehow
i am beginning to
understand your vows

but i got
stuck there
right in the middle not
knowing

these unbelievable
thoughts could
cross your mind

and please say
something
it doesn't matter what
somehow
i am beginning to
understand your vows

but i got
stuck there
right in the middle not
knowing
these unbelievable
thoughts could
cross your mind

and please say
something
it doesn't matter what
somehow
i am beginning to
understand your vows

generic genes (spare parts)

take it back
you're in another scene now
if you'd like then
a part of me
could stay here
move on over
everything's in place now
one more misshape
one more part that
breaks down

liquid fever
the one that stays inside you
shapes are broken
time to let it go now
if you're willing
sacrifice the one now
if you'd like then
a part of me could stay here

what's the racket, grab the ratchet, time to hack it
attach it, to the bracket don't touch the magnet

follow where we trace the signal
the source selected, it's grounded
can't be conducted without it
left at the highest moment, can't remember when
but came back the scene changed then we went again
a free for all with many sorts involved
watch the parts dissolve til all is lost
but as you wait, i heard that there's a way to save some
collect everything that connects to the bass drum
we'll take a journey and venture back at a later date
no need to worry now, everything was saved to tape
control the medium, listen when the people speak
note the elements, even if they're incomplete
as it filters through..don't interrupt the code
no need to look around. there'll always be enough to load

take it back you're
in another scene now

take it back you're
in another scene now

take it back you're
in another scene now

take it back you're
in another scene now
